

CREAM DETERGENT FOR THE CLEANING AND PROTECTION OF LEATHER SURFACES

- Prevents the build-up of dust on treated areas, making subsequent cleaning easier.
- Preserves leather's softness and elasticity, preventing the formation of cracks and splits.
- Renews leather and returns it to its original splendour.

SUGGESTIONS

P60 LEATHER CARE is also ideal for the cleaning and protection of all leather inserts.

DESCRIPTION

Just like our skin, a leather surface can be subject to early ageing if not adequately treated, thus losing its original softness and appearance. To prevent ageing, it is necessary to regularly clean, nourish and protect the leather surfaces in vehicle interiors, keeping their splendour intact. P60 LEATHER CARE is a cream detergent specifically for the cleaning and protection of leather surfaces.

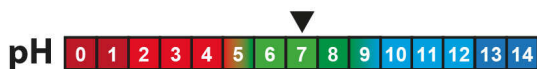

Thanks to its innovative formula with Avocado oil, P60 LEATHER CARE:
Offers efficient yet delicate cleaning of surfaces.
Renews leather and returns it to its original splendour.
Preserves leather's softness and elasticity, preventing the formation of cracks and splits.
Guarantees long-lasting protection for leather, increasing its natural water-resistance.
Prevents the build-up of dust on the treated areas, making subsequent cleaning easier.
Leaves no residue whatsoever, and avoids the typical "sticky" sensation of treated surfaces.

P 60 LEATHER CARE

CREAM DETERGENT FOR THE CLEANING AND PROTECTION OF LEATHER SURFACES

PHYSICAL AND CHEMICAL CHARACTERISTICS

Appearance	Creamy emulsion
Color	White
Odour	Scented
Specific weight	1.000 ± 0.005 g/cc
